- Inspection Fee (Twp Code Ch. 13-1.11)
 - *Openings equal to or less than 9 SQ. FT / 1 SQ. YD.* required fee in the amount of \$100.00.
 - *Openings greater than 9 SQ. FT and under 100 linear feet* required fee in the amount of \$200.00.

ROAD OPENINGS DISTURBING 90 SF OR GREATER:

- Application Fee in the amount of \$1,000.00 (Twp Code Ch. 13-1.3)
- Street Opening Performance Bond in the amount of \$4,000 for a term of five (5) years (Twp Code Ch. 13-1.6) ***(Original Bonds shall be submitted to the Municipal Clerk)***
- Inspection Fee in the amount of \$200.00, plus \$100.00 per 100 linear feet thereafter (Twp Code Ch. 13-1.11)

***** Application Fee and Inspection Fees are non-refundable and shall be paid in separate checks *****

CERTIFICATE OF INSURANCE:

All applications require submission of a Certificate of Insurance in the minimum amount of \$100,000-\$250,000 for bodily injury, \$25,000 property damage for the purpose of indemnifying the Township of Neptune, in the County of Monmouth, for any personal injuries or property damage, which might be sustained during the work progress. (Twp Code Ch. 13-1.5)

MORATORIUM FOR ROAD WORK IN THE HISTORIC DISTRICT OF OCEAN GROVE:

§ 13-1.4. Excavation of Streets Not Permitted During the Summer Season in the Ocean Grove Historic District. [Ord. No. 2016-19].
A road excavation permit issued for any street within the Ocean Grove Historic District shall only be valid between September 16th and April 30th. No excavation of streets shall be permitted within the Ocean Grove Historic District between May 1st and September 15th. A road excavation permit may be issued for a road excavation during the prohibited time period in the event of emergency circumstances as determined by the Director of Public Works.

EXCAVATION OF NEWLY PAVED STREETS:

No street opening permit shall be issued by the Director of Public Works that would allow an excavation or opening in paved and improved street surface less than five (5) years old unless the applicant can clearly demonstrate that public health or safety requires that the proposed work be permitted or unless an emergency condition exists.

If determined that the roadway needs to be opened in the event of an emergency, the following penalty shall apply.

The penalty charge shall be on a sliding scale determined as follows:

- | | |
|---|------------------|
| a. Penalty assessment | = \$2,500 |
| b. Area of road cut in S.F. x \$7.00 | = Varies |
| Total a. and b. | = Varies |

Penalty factor is three (3%) percent of the above total for each unelapsed month or fraction thereof of the three (3) year (36 months) restricted period. Maximum penalty shall be one hundred eight (108%) percent of above total and minimum penalty shall be five hundred (\$500.00) dollars. Inspection and permit fees are payable in addition to the penalty charges set forth herein pursuant to subsection 13-1.13. **No portion of the penalty charge shall be refundable and penalty charges do not relieve the permit holder from the required performance cash bond or the required insurance. Restoration of all road openings in "new street" pavement shall be to a "newly paved" condition. The restoration shall be according to subsection 13-1.10.**

IMPORTANT!

Please provide the following information to your contractor prior to the commencement of the street opening.

§13-1.10 Backfilling; Restoration of Surface.

The permittee shall assume all responsibility and hold the Township harmless for any property damage or bodily injury which may occur as a result of the work performed from the time the work commences until the permanent restoration has been made by the permittee. The permittee shall immediately backfill the opening with excavated material if such material is suitable, in layers not exceeding two (2') feet in thickness if heavy compacting equipment is used or in layers not exceeding one (1') foot in thickness if hard or light compacting is used. This fill shall be brought to an elevation of six (6") inches below the permanent surface. If the Director of Engineering & Planning, or their designated representative, determines that the excavated material is not suitable for backfilling as specified, then it shall be removed from the site and the opening backfilled as herein specified with suitable material, then six (6") inches of road gravel of a grade satisfactory to the Director of Engineering & Planning, or their designated representative, shall be applied and thoroughly compacted. This temporary restoration shall be checked for settling and all holes shall be filled evenly with the surface of the adjoining pavement.

Once the excavation work area has been properly saw cut, and the backfill tamped and compacted, the permittee shall install no less than six (6") inches of bituminous stabilized base course to the trench surface. If the distance from the edge of the excavation work area to the existing curb is less than two (2') feet, the permittee shall be required to excavate to the curb and evenly install six (6") inches of bituminous stabilized base course in the entire area.

The partially restored pavement shall be allowed to settle for no less than ninety (90) and no more than one hundred eighty (180) days. If at any time during the settlement period, the trench becomes unacceptable as determined by the Director of Engineering & Planning, the permittee shall be notified of the condition requiring repair, and such repair shall be performed within twenty-four (24) hours of such notification by the Director Engineering & Planning. If the repair is not made in the time specified, the Township may make the repair and any cost thereof will be charged against the permittee's cash repair deposit and/or maintenance bond. At the end of the period of time of settlement required by the Department of Engineering & Planning, an inspection shall be performed by the Department.

At this time, the permittee shall be required to mill the excavation work area surface to a width equal to one (1') foot wider on each side of the initial repair and install no less than two (2") inches of FABC surface course. The permittee shall also be required to provide a tack coat on all existing bituminous and concrete surfaces and a hot-poured, rubber asphalt joint sealer (per current DOT Standard Specifications for Roads and Bridges).

Unless authorized by the Department of Engineering & Planning, any excavation less than ninety (90) square feet/ten (10) square yards shall require milling and restoration of the excavation work area extending a minimum of one (1') foot beyond the edge of excavation to the nearest curb. Any excavation equal to or greater than ninety (90) square feet/ten (10) square yards shall require milling and restoration of the excavation work area extending from curb to curb (full width of road) and extending a minimum of one (1') foot beyond the outer edges of the excavation. If the excavation work area will be within -five (75') feet or less of previous excavations occurring within Two (2) Years of the subject excavation (by same permittee along the same side of the road), the permittee shall be required to mill and restore the roadway between the outer most excavations. The director of Public Works reserves the right to change the restoration of surface requirements at any time and to extend the restoration limits where feasible to allow for better transition of old asphalt roadways.

The permittee shall be required to replace any facilities including, but not limited to, curb, pavement, sidewalk, line striping, etc., that is affected by the excavation and restoration work, at the permittee's expense. Such work shall be performed according to Township standards.

Work that is completed in the public right-of-way, but outside of the cartway, should be restored to existing conditions. If the work contains curb and sidewalk, then the area shall be restored with curb and sidewalk in accordance with the Township Engineer's review and recommendations on specifications.

If the work was other than sidewalk, such as slate or pavers, then it shall be restored to slate or pavers or the material that existed prior to excavation.

(Ord. No. 2024-01)
