

NJ CLEAN MARINA:

The Clean Marina promotes clean water and fresh air by providing technical advice and educational materials to marine operators and boaters. We are a full service Marina. Some examples of what we try to control is vessel maintenance with repair, petroleum control, sewage handling, waste containment and disposal, stormwater management, marina management, marina maintenance modification, laws and regulations. We also play a huge role in keeping New Jersey's beautiful water clean. We are an environmentally-responsible business dedicated to protecting New Jersey's water resources and enhancing the boating experience.

Please take a moment to visit their website below and learn more about the NJ Clean Marina Program.
